## **ABT Sportsline 2019 – Press Release CW 24** **Urus is the first Lamborghini with ABT Power, delivering 710 hp and 910 Nm**

Lamborghini is probably the Audi and VW Group's sportiest marque. "Of course, that is why it came to our attention," says Hans-Jürgen Abt, CEO of the tuning provider **ABT Sportsline**. The family business is celebrating the debut of a performance kit for the Urus, capable of 189.5 mph, making it a truly super SUV. This beautifully impressive vehicle's standard V8 bi-turbo engine puts down 650 hp (478 kW) with a maximum torque of 850 Nm, but **ABT Power** provides even greater driving pleasure. Thanks to the high-tech control unit **ABT Engine Control** (AEC), the data sheet now boasts 710 hp (522 kW) and 910 Nm.

In order to truly comprehend the significance of these figures, we must compare them to those of a supercar from the 1980s. The legendary Lamborghini Countach LP400S V12 was the winner in many a game of 'Top Trumps' and was considered pretty much unbeatable. Nevertheless, its 375 hp is merely half that of today's **ABT Sportsline**-optimised Urus. Despite its heavier weight, this SUV is also considerably faster, with acceleration comparable to modern sports cars such as the brand-new Porsche 911 Carrera S. After the performance upgrade by the world's largest tuning provider for vehicles from the VW and Audi Group, the Urus now sprints from 0-60 mph in 3.4 instead of 3.6 seconds.

With a full warranty and perfect tuning, you can rely on **ABT Sportsline**. Each performance upgrade is tailor-made for each vehicle type and meticulously tested. This also includes gathering data via a state-of-the-art, reference-class dynamometer. However, the enormous driving pleasure of the Urus first becomes evident on the road. Here, the typical Lamborghini engine sound and massive performance increase by **ABT Sportsline** come together brilliantly.
