

ABT Sportsline 2020 – Press Release CW 40

The new standard for compact sports estates ABT RS4-S impresses with 510 hp and comprehensive aero package

The current Audi RS 4 can look back on an impressive lineage that goes back to the RS2. While it recently received a facelift, **ABT Sportsline** is already showcasing the next stage of its evolution. The special edition **ABT RS4-S** features an alluring aero package and clearly offers more performance*: 510 hp (375 kW) and 660 Nm are the key data. This means an increase of 60 hp or 44 kW and 60 Nm compared to the standard 450 hp (331 kW). This is made possible by the high-tech control unit **ABT Engine Control** and a special air intake cover. The acceleration is correspondingly impressive – from zero to 100 km/h in 3.9 seconds. If you want a further performance upgrade, **ABT Power S** is available for an extra charge, and this will achieve 530 hp (390 kW) and 680 Nm. As an exclusive extra for this version, a V-max increase to 300 km/h is available on request.

"The Audi RS4 has been an icon since the first generation in 1999," explains Managing Director **Hans-Jürgen Abt**: "We have added some exciting new features to this high-calibre performer, and now it has even more fire." The incendiary head-turner's individual look starts with the **ABT AeroKit**, which is only available in this configuration for the **ABT RS4-S**. Included in the scope of delivery: **ABT front lip add-on** with model name, **front blades** and **wheelhouse ventilation**, which are adorned by a real carbon fin. A **CFRP rear spoiler** and **rear skirt insert** are also included. Finally, the **ABT stainless steel exhaust system** makes it look & sound perfect: Four **102 mm carbon-fibre end pipes** emphasise the self-confident appearance. The 21-inch **ABT SPORT GR** alloy wheels come into their own in glossy black.

To ensure that longitudinal and lateral dynamics are perfectly balanced, the package also includes **ABT height adjustable suspension springs** as well as **ABT anti-roll bars** on the front and rear axles. The world's largest tuner of vehicles from Audi and VW also provides the **ABT coilover suspension** for an extra charge. The **ABT RS4-S** also has a dynamic interior: **RS4-S logos** feature on the **seat refinement**, **door sills** and **floor mats**. An **emblem badge** adds the finishing touch to the interior. For an additional charge, **carbon fibre** for the **seat shells**, **seat frame covers** and **dashboard covers**, and the new **leather and carbon upgrade for the steering wheel** are available. As such, the power estate delivers even greater driving pleasure.

*The engine performance data is in accordance with the stipulations of EWG/80/1269. The process and dynamometer manufacturer have been certified and authorised by the vehicle manufacturer. For further details, visit www.abt-sportsline.com/performance-measurement.
