

## **ABT e-Line 2020 – Press Release CW 22**

### **Electric drive – captivating looks ABT e-Transporter 6.1 with optional aero package ready to go**

The beginning of June sees the start of production of the **ABT e-Transporter 6.1**. As with its predecessor, **ABT e-Line**, an official premium partner of Volkswagen Commercial Vehicles, is responsible for converting the vehicle to electric drive. The Schaeffler Group is acting as a strategic co-operation partner in this process. Together with the **ABT Group**, they have been performing pioneering work in Formula E as part of a technological partnership since 2014. The **ABT e-Transporter 6.1** delivers a maximum output of 83 kW and a maximum torque of 200 Nm. The vehicle will be available with top speed options of either 90 km/h or 120 km/h. The range is between 105 and 138 km depending upon specification (according to WLTP), (gross) battery capacity is 37.3 kWh and electricity consumption between 27.0 and 35.8 kWh/100 km. The battery from the **ABT e-Transporter 6.1** weighs 333 kg and is fully charged with AC from a 7.2-kW wallbox in approximately 5.5 hours. Alternatively, it can be charged to 80% capacity from a 50-kW rapid-charging station (CCS) in approximately 45 minutes. The vehicle is available to purchase or lease from selected Volkswagen Commercial Vehicles dealers (VWCV) or via **ABT e-Line Partners**. For more information, consult the international [dealer locator](#). The Transporter will be available in Germany, France, Sweden, Poland, Spain, UK and Italy.

Because the “VW bus” has always been more than “just” a commercial vehicle, **ABT Sportsline** has an ace up its sleeve: the optional **aero package**. The comprehensive set from the world’s largest tuner of VW and Audi vehicles includes a front skirt add-on, a front grille add-on, side skirts, rear wing and rear skirt. Furthermore, the **ABT Sport GR 9.0 x 20-**inch alloy wheels are a feast for the eyes. Two finishes are available: matt black with diamond-machined finish or glossy black with diamond-machined rim flange.

The **ABT e-Transporter** is not just a pretty face. It also offers a full loading capacity of 6.7 m<sup>3</sup>. The kombi or caravelle transports up to nine people. The maximum payload is 1,096 kg as a commercial vehicle and up to 977 kg as a passenger vehicle. It can also handle braked trailer loads of up to 1,500 kg (750 kg unbraked). The **ABT e-Transporter 6.1** is available exclusively with long wheelbase and in left-hand or right-hand drive versions. Net list prices start at €44,990 for the panel van, €49,623 for the kombi and €56,475 for the caravelle Comfortline. **ABT e-Transporter Leasing** is also available, starting at €459/month for the panel van.
